Calibration

Complete using one of 1.-4. to follow.

- “My priority is to be able to:”
- “Everyone, no matter their socioeconomic background, should be able to:”

Choose one.:

1. become richer than currently;
2. become richer than the parents;
3. get to an income percentile in society higher than currently;
4. live in a society where the gap between the richest and poorest (x%) is smaller than currently.

(Instead of "become richer" and "income percentile", can instead say "have greater control over one's destiny" and "socioeconomic class", or yet other alternatives.)

FIGURE 4. INCOME MOBILITY AND SOCIAL MOBILITY. EACH OF THE LEFT AND RIGHT PANELS—SOCIETIES (A) AND (B) RESPECTIVELY—SHOWS A DISTRIBUTION OF INCOME y CHANGING THROUGH TIME t . EACH SMALL CIRCLE REPRESENTS 20% OF THE GROUP WHOSE INCOME DISTRIBUTION IS DEPICTED. THE LEFT PANEL, THAT FOR SOCIETY (A), SEES AN INCREASE IN AVERAGE INCOME, BUT LEAVES UNRESTRICTED WHO GOES WHERE IN THE INCOME DISTRIBUTION. WHEN (A) IS CONFINED TO THE BOTTOM 50% IN SOCIETY, THIS CHANGE IN AVERAGE INCOME IS WHAT THE TEXT REFERS TO AS INCOME MOBILITY. THE RIGHT PANEL, THAT FOR SOCIETY (B), SHOWS THE GROUP ORIGINALLY IN THE 21ST–40TH PERCENTILE, (I.E., THE SECOND 20%) EXPERIENCING UPWARD SOCIAL MOBILITY IN TRANSITIONING TO THE THIRD 20%: THEY RISE IN SOCIETY. FOR THIS TO HAPPEN, HOWEVER, SOME GROUP ORIGINALLY IN THE TOP 60% MUST FALL INTO THE BOTTOM 40%, THEREBY EXPERIENCING DOWNWARD SOCIAL MOBILITY. PUT DIRECTLY, IF PREVIOUSLY YOU HAD 60% OF THE POPULATION RICHER THAN YOU BUT NOW ONLY 40%, THEN ONE-FIFTH OF THE POPULATION, SOMEWHERE, MUST HAVE FALLEN IN THE PROCESS. UPWARD SOCIAL MOBILITY IS IMPOSSIBLE WITHOUT, AT THE SAME TIME, EQUAL AND OPPOSITE DOWNWARD SOCIAL MOBILITY. SOCIAL MOBILITY IS A ZERO-SUM PROPOSITION.

“共同繁荣”

Common Prosperity

Channels of Concern

“Globalisation and technological change have polarised society into a small elite with highly paid, secure jobs on one side, and on the other side are growing numbers of people, including an increasingly squeezed middle class, in insecure, poorly-paid work.”

Growing inequality has resulted in “erosion of solidarity, social trust and faith” in society’s institutions.

“An unbalanced division of opportunity puts at risk national prosperity.”

“It gets harder and harder to climb the ladder of opportunity when that ladder’s rungs grow further and further apart.”

Inequality hypotheses

“Inequality immiserises the disadvantaged in society and, through obstructing social mobility, frustrates expectations of a better life. All these cause social discord.”

“Inequality-driven social discord produces political upheaval.”

Sufficient statistic and spillovers

“Around the world, the effects of alarmingly high economic inequality are spilling over into politics and society. Economic insecurity is a driving force behind violent conflicts in the Middle East and the rise of fascist elements in some European countries, not least Hungary and Poland. Even in older democracies such as the United States, economic marginalization has led to a strengthening of chauvinist and supremacist identities and other social problems such as the opioid epidemic.”

Beyond globalization: “Changes in technology, rise of winner-take-all markets, erosion of labour-market protections, and decline of norms restricting pay differentials have all played their part.”

Resource-Inadequacy vs Disparity

“In every country many people have little prospect for a better future. Lacking hope, purpose, or dignity, they watch from society’s sidelines as they see others pull ahead to ever greater prosperity. Worldwide many have escaped extreme poverty but even more have neither the opportunities nor the resources to control their lives.”

(HDR 2019)

But what will repair this? Reducing inequality? Or allowing poor people resources and opportunity?

Resource-Inadequacy vs Disparity

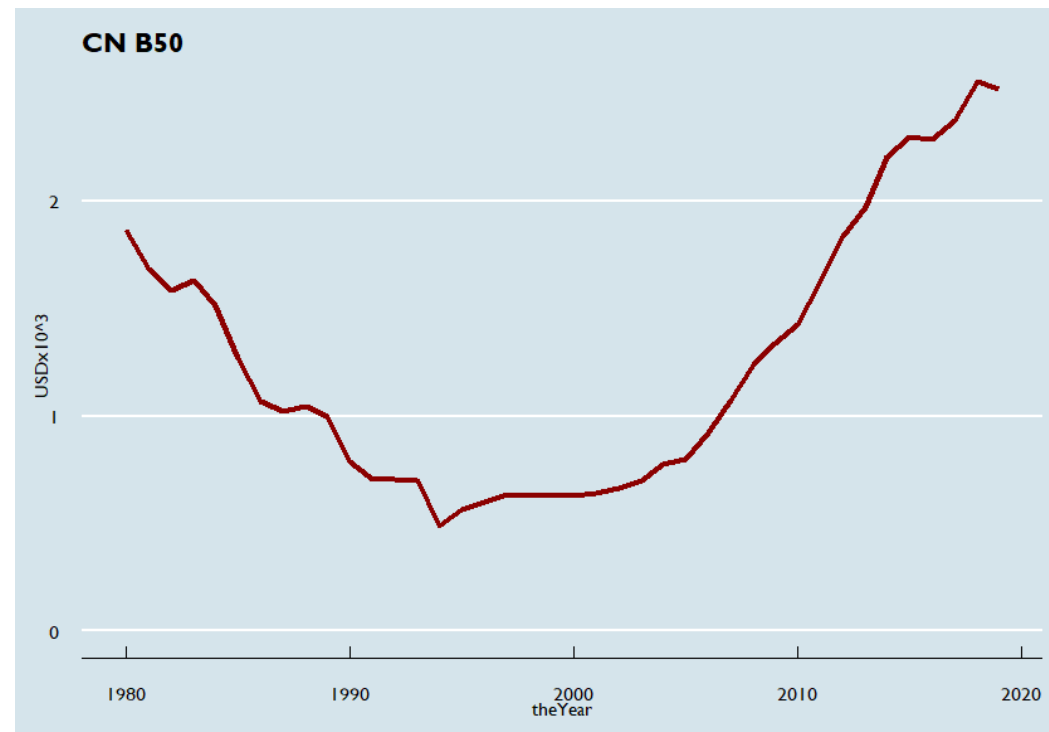

Starvation, child hunger, and inter-generational recidivism are problems of poverty and immobility, not inequality: Individual characteristics, not group traits

What makes for enabled, meaningful, and satisfying lives?

Singapore

China

US

2000-2019 When the bottom 50% rise, so too inequality

6

1. In 99 economies inequality rose; B50 increased in 95 of them.
2. In 108 economies B50 increased; inequality rose in 88% of them.
3. Levels of inequality have insignificant correlation with mobility or heightening inequality.

Correlation

		Correlation	95% Confidence Interval	t(154)
Income Mobility	Inequality Rise	0.84	(0.79, 0.88)	19.45
Income Mobility	Inequality Level	-0.03	(-0.19, 0.13)	-0.40
Inequality Rise	Inequality Level	0.01	(-0.15, 0.17)	0.14

1. In 99 economies inequality rose; B50 increased in 95 of them.
2. In 108 economies B50 increased, inequality rose in 88% of them.
3. Levels of inequality have insignificant correlation with mobility or heightening inequality.

Why then the focus on inequality?

“Concern for relativities is not unnatural”.

But then:

- Corrosiveness?
- Politics of envy?
- What basis is this for public policy?

“Hasad” vs “Rushk”, “Lipta”

- Gender inequality
- Climate inequality
- Pandemic inequality

Certainly corrosive, yes...

“It is not enough that I succeed. Others must fail.”

“Us vs them”. Identity politics. Tribal affiliation and resentment.

Zero-sum game in political and economic life

Sufficient statistic and spillovers

“Around the world, the effects of alarmingly high economic inequality are spilling over into politics and society. Economic insecurity is a driving force behind violent conflicts in the Middle East and the rise of fascist elements in some European countries, not least Hungary and Poland. Even in older democracies such as the United States, economic marginalization has led to a strengthening of chauvinist and supremacist identities and other social problems such as the opioid epidemic.”

Beyond globalization: “Changes in technology, rise of winner-take-all markets, erosion of labour-market protections, and decline of norms restricting pay differentials have all played their part.”

... but also need greater clarity?

“New analysis ... showing that 14mn people live in poverty highlights just how unequal a society the UK has become.”

“The poorer half of the population are as poor today as they were in the past, with barely 5 percent of total wealth in 2010, just as in 1910.”

US Wealth Inequality 2005	Survey estimate share	Actual share
Top 20%	59%	84%
Bottom 40%	10%	0.3%
